IPL Analysis Dashboard

2008–2025

Transforming raw cricket data into strategic insights

Project Overview

Comprehensive Data

Match-level and ball-by-ball data from 2008–2025

Meaningful Insights

Team performance, player achievements, tournament trends

Interactive Platform

Evaluate dominance, consistency, and analytics

Problem Statement

The Challenge

IPL produces massive datasets every season. Extracting insights manually is complex and time-consuming.

Our Solution

- Season-wise performance analysis
- Dynamic champion identification
- Orange & Purple Cap tracking
- Points table evaluation
- Batting and bowling trends

Data & Methodology

Data Sources

Match-level, ball-by-ball, player, and team datasets

Relational Model

Matches connect to ball-by-ball data, teams, and player metrics

DAX Measures

Dynamic KPIs and season-based calculations

Dashboard Features

Season Slicer

Dynamic selection from 2008 to 2025

Champion & Runner-Up

Automatic final match winner identification

Key KPIs

Matches, teams, boundaries, centuries, venues

Player Cards

Orange Cap, Purple Cap, most fours and sixes

Points Table

Matches, wins, losses, no results, total points

2025 Season Highlights

74	10	1296	2251
Matches	Teams	Sixes	Fours

9	143
Centuries	Half-Centuries

🏆 Champion

Royal Challengers Bangalore

🥈 Runner-Up

Punjab Kings

Player Performance – 2025

Orange Cap

B Sai Sudharsan

Gujarat Titans

759 Runs

Purple Cap

M Prasidh Krishna

Gujarat Titans

25 Wickets

Most Fours

B Sai Sudharsan

Gujarat Titans

88 Fours

Most Sixes

N Pooran

Lucknow Super Giants

40 Sixes

Key Analytical Insights

01

Aggressive Batting Trend

High boundaries indicate power-hitting evolution in T20 cricket

02

Consistency Wins Titles

RCB and Punjab secured 19 points each—league-stage consistency crucial

03

Team Balance Over Individual Brilliance

Gujarat had both Orange and Purple Cap winners but didn't win championship

04

Competitive League Structure

Minimal point differences show high competitive intensity

05

Performance Distribution

Top 3–4 teams contribute majority of wins

Business & Strategic Value

- Team Strategy Evaluation
- Player Benchmarking
- Match Planning
- Auction Support
- Fan Engagement

Technical Implementation

DAX Concepts

- CALCULATE()
- SELECTEDVALUE()
- MAX()
- Filter Context Manipulation
- Dynamic Season Filtering

Key Functionalities

- Dynamic Champion Calculation
- Points Table Aggregation
- Season-based KPI transformation
- Interactive slicer-driven visuals
